Concept of the Summer School in Palliative Medicine

The Physicians' Group of **palliative.ch** has been mandated to bring its members together on a regular basis for targeted continuing education in our field and specialty. For the 11th edition of the Summer School, we will once again offer an engaging and high-quality program.

The aim of the Summer School is to foster a strong professional community, develop a shared vision, prepare for future challenges, and strengthen networking within our medical subspecialty. As in previous years, plenary sessions will be held primarily in English, while discussions may take place in participants' native languages or in English.

Through this program, we aim to contribute to high-quality continuing medical education in palliative care by providing expert insights and enabling in-depth discussion of key topics. In addition, the Summer School offers an opportunity for colleagues from across Switzerland to exchange knowledge and share their experience.

Scientific Organizing Committee

Prof. Dr. med. David Blum

Prof. Dr. med. Sophie Pautex

Dr. med. Renate Grathwohl

Dr. med. Luigi Stanco

Dr. med. Fabia Weisser

Dr. med. Rachel Rutz
